REPORT OF THE PROVOST

(SIR GREGORY FOSTER)

FOR THE

SESSION 1926–27

TOGETHER WITH A

RECORD OF THE PROCEEDINGS

AT THE

CENTENARY CELEBRATIONS.

Full Case
1 b

UNIVERSITY OF LONDON, UNIVERSITY COLLEGE.

REPORT OF THE PROVOST

(SIR GREGORY FOSTER)

FOR THE

Session 1926-27,

TOGETHER WITH A

Record of the Proceedings

AT THE

CENTENARY CELEBRATIONS.

THE Session 1926–27 will be memorable in the history of University affairs, not merely because of the Centenary Celebrations of this College, but also because of two outstanding events affecting the University of London as a whole.

By the passing of the University of London Act, in December 1926, and the appointment thereunder of Statutory Commissioners to make Statutes for the University "in general accordance with the recommendations contained in the Report of the Departmental Committee," the main constitutional issues may be regarded as settled, at all events for a considerable period of time.

The setting up of a Council which will be responsible for financial policy will, it may be hoped, produce greater confidence in the financial administration of the University in the minds of public bodies than has prevailed hitherto, and should result in the evolution of a University policy based on sound finance.

The changed constitution of the Senate and the establishment of a Collegiate Council should go far to strengthen the academic policy of the University and to bring the various Colleges into closer association with the University. With the latter object in view, and also for the purpose of keeping the number of members of the Senate within reasonable dimensions, this College consented to its representation on the Senate being reduced from two to one.

The Statutory Commissioners have many important issues to solve. It will be the aim of the College to assist in their solution, so that the new constitution of the University may be made an instrument for the effective discharge of the great work that lies before the University as a whole.

The other great event in the life of the University is the final acquisition of the Bloomsbury Site. In my Report last year, I ventured to say that, although the Site had been re-sold by the Government to the Duke of Bedford, it was hardly credible that the Institute of Historical Research, the University Union Society, and the Architectural Atelier would be allowed to disappear. The problems connected with the continued life of those three institutions were, indeed, so insistent that it became evident that a determined effort must be made to repurchase at least some portion of the Site.

A careful investigation of other problems affecting the welfare of the University, among them the housing of the Administrative Staff and of the University Library, convinced our present Vice-Chancellor, Sir William Beveridge, that nothing but the re-acquisition of the whole of the Bloomsbury Site would meet the needs of the case. Once convinced, he set to work with characteristic vigour, and enlisted the financial aid of the Rockfeller Foundation of New York, with the result that the

conveyance of the whole of the Bloomsbury Site to the University took place in the week in which the College Centenary Celebrations were held.

In his Dedication of the Great Hall on the 24th of June, Prince Arthur of Connaught referred in the following terms to the Site question: "The recent settlement of the question of the Site for the Headquarters of the University as a whole is a tribute to the wisdom of your founders in selecting the Site of the College. That solution and many other indications make me confident that the prospect that lies before the College at the beginning of its second hundred years is full of promise."

Owing, on the one hand, to the Centenary Fund, and, on the other, to the impending Centenary Celebrations—to both of which refence will be made later—the work of the Session has been unusually laborious.

The hand of death has fallen heavily upon the College and rendered the labours of the year more difficult, for it has taken from the active service of the College the Secretary, Dr. Walter Seton, and Professor Ernest Starling.

Throughout the twenty-three years that Dr. Seton held the office of Secretary, he worked zealously and unremittingly for the welfare of the College and of the University as a whole. There was no aspect of College life or of College development in which Dr. Seton failed to take a hand. In many of the most effective movements during that period he had been the leader, notably in the foundation of the Hall at Ealing, in the Ramsay Memorial, and in the initiation of the Centenary Fund. In the midst of new plans for a full realisation of that Fund, he was taken from us, and the College was deprived of his ripe experience and of the many years of service that he would normally yet have rendered.

It is not less difficult to express the debt that the

College owes to Professor Starling. Alike as a teacher and as a promoter of research, he had inspired many generations of students and research workers. In the movement for the better endowment and better housing of the College that was begun in 1902, Starling took a leading part. He formulated the scheme that led to the new building for the Department of Physiology in 1909, and to that for Pharmacology two years later—a scheme that prepared the way for the great gift of the Rockefeller Foundation in 1920. He had been in failing health for some time, but, none the less, he threw himself with whole-hearted devotion into the arrangements for the Centenary. No one who had the privilege of hearing the first of the Centenary Addresses, on the 28th of February, when Starling lectured on "A Century of Physiology," could have realised that he was to be taken so soon from us, for that Address was inspired by his youthful zeal and enthusiasm.

The list of deaths also includes those of the Viscount Cowdray, Sir William Gwynne Evans, Baronet, Mr. Leverton Harris—generous benefactors of the College; of Sir Luke Fildes, the Rev. P. H. Wicksteed, and the Right Honourable T. M'Kinnon Wood, formerly Life-Governors; of Sir Edward Busk, a Fellow and former Vice-Chairman of the College Committee; of Mr. John Hooper, a Fellow; of Mr. Ambrose McEvoy and Dr. E. S. Pasmore, formerly members of the Staff.

The chief changes that have taken place, or will take place, in the Academic Staff are as follows:—

Professor F. C. Montague has retired from the Astor Chair of Mediæval and Modern History, and Professor A. F. Pollard from the Chair of English History. The latter, however, to our great satisfaction, remains a member of the Staff, having been appointed to a new office—that of Director of the Institute of Historical Research and Professor of Constitutional History.

Professor J. E. Neale returns to the College from Manchester, to fill the Chair of English History, which will henceforward be known as the Astor Chair, while Mr. Hale Bellot goes to Manchester as Reader in Modern History.

Mr. Pocock has been appointed Professor of Classics at Christchurch, New Zealand, and Dr. Woollard, Professor of Anatomy in the University of Adelaide. Dr. W. E. Garner, Reader in Physical Chemistry, has been appointed Leverhulme Professor of Physical Chemistry in the University of Bristol.

Mr. W. W. Russell, of the Slade School, has accepted the office of Keeper of the Royal Academy, but maintains his connection with the Slade School in the capacity of an additional Visitor.

Appended to this Report is a list of the Honours and Appointments obtained by members of the College since this time last year. The most noteworthy among these are the appointment of Mr. A. G. Tansley, Fellow, to the Sherardian Professorship of Botany at Oxford; of Mr. G. F. Forsey to the Professorship of Classics in University College, Southampton; and of Mr. Hamada to the Professorship of Archæology in the University of Tokio.

The range and importance of the publications indicate that the researches of the Staff and their Students have been well maintained.

The total number of Students was 3228 compared with 3235 in the previous Session. Of these 1737 (1664)* were full-time Students and 533 (505)* were Postgraduate and Research Students. The lists of graduations include 323 (280)* from the College, of whom 240 (216)* took Bachelor Degrees, 162 (194)* obtaining Honours and 83 (64)* Higher Degrees. To these must be added 157 (162)* Diplomas and Certificates.

* The numbers in brackets are those of the previous Session.

The various student activities, whether those devoted to special studies, or to athletic, dramatic, and musical achievement, have been well maintained and will be dealt with more fully in the Annual Report that will be issued in March 1928.

The work of the Centenary Appeal has been carried on. Since the death of Dr. Seton, Dr. F. W. Goodbody has acted as Honorary Secretary and Mr. G. P. Crowden as Organising Secretary. The Appeal Fund has now reached a total of about £132,000, of which £25,000 has been given by the Rockefeller Foundation of New York for the endowment of the Department of Pharmacology.

The programme of the Centenary Celebrations was organised by a Special Committee, of which Mr. J. A. Creighton was appointed Secretary. The detailed programmes are attached.

The Inauguration of these Celebrations by Their Majesties the King and Queen gave to them the national and imperial significance that the movement inaugurated by our Founders deserves.

The presence of 208 delegates from all over the world was a pleasant recognition of the position that the College holds in the esteem of the Universities and Academies of Learning. By the arrangement of Group Dinners, it was possible for members of the College to enter into close personal intercourse with many of the delegates. To the Hosts who were good enough to arrange these Dinners, I desire, in the name of the College, to tender our grateful appreciation. To the Bishop of Manchester our thanks are due, for the Sermon that he preached in Westminster Abbey, and for the care with which he set out the meaning of the principles of our founders in relation to the controversies of the time. The Union Societies, the Old Students' Association, and the Dramatic Society played their parts in the Celebrations with great

zeal and effectiveness. Professor Oliver, Dr. Violet Anderson, and Dr. Haas enrolled an active body of workers for the Conversazione, and achieved a great success. Professor Tonks, Mr. C. Koe Child, and their fellow workers arranged an impressive Exhibition of works by Members of the Slade School from the time of its foundation in 1871 to the present day. The results of Professor Sir Flinders Petrie's excavations in Palestine formed an interesting Exhibition, which was very attractive to the delegates and members of the general public. The Lectures and Demonstrations given by members of the Staff and some Postgraduate Students were well attended and greatly appreciated.

The hospitality of the Master and Wardens of the Worshipful Company of Drapers was a great source of pleasure to our delegates and to the members of the College and University.

The Centenary Celebrations are over, and those who took part in them are not likely to forget them. The College enters upon the second hundred years of its work in a spirit of thankfulness for the great efforts of those who have made it what it is, and in the hope that its progress in the future and its contribution to sound learning will not be less remarkable than in the past hundred years.

Centenary Celebrations.

23rd of JUNE, 1927.

Address by the Chairman of the College Committee

TO

THEIR MAJESTIES THE KING AND QUEEN.

May it please Your Majesties:

I offer to Your Majesties on behalf of this College our most humble duty and a most respectful and loyal welcome.

Your Majesties have honoured the College by your presence on more than one occasion, but to-day we ask Your Majesties to inaugurate a celebration which is at one and the same time a thanksgiving for a hundred years of successful endeavour, an expression of pride in the present, and a prayer for continuance of usefulness in the future.

On April 30, 1827, the foundation stone of the College was laid by H.R.H. the Duke of Sussex, and in the following years lectures were inaugurated in the Faculties of Arts and Laws, and of Medicine.

In 1836 a Charter was granted to the College by His Majesty King William IV.

The College was founded with the object of making advanced education accessible to all without religious tests or distinctions, and its basic principle, as adopted by its founders, was that of complete impartiality among different religious beliefs.

This principle did not pass without challenge at the time, but it is unnecessary to do more than indicate this fact, for the principle, which was novel, nay seemed almost revolutionary, in 1827, is a commonplace to-day; the controversies of a hundred years ago have passed into the limbo of forgotten things; and to-day the ancient Universities of Oxford and Cambridge, and our twin sister College in the University of London, King's College, are represented at our celebrations, and rejoice with us in the completion of a hundred years of fruitful existence.

Until the foundation of this College, the two ancient Universities of Oxford and Cambridge alone offered teaching of a University standard to the people of England, so we can claim this College as the pioneer of those many modern Universities which have been established during the last and present century, bringing within the reach of the people at large teaching of the highest quality and the most advanced and comprehensive of its kind.

Again, in that very important matter of Women's

Education the College can claim to be the pioneer. It was here that, soon after the opening of the College, the first steps were taken by certain Professors and Members of the College Council for the purpose of providing higher education for women, and in 1878 women were admitted on the same terms as men to the Faculties of Arts and Laws, and of Science. The admission of women to University education has now been accepted as a matter of course not only in London, not only in the Universities of the United Kingdom, but to a substantial extent throughout the Universities of the whole world. No doubt this would have come about in any case, but the fact remains that the impulse thereto came from University College.

And so I might go on, but it would not be fitting on an occasion such as this to draw out the long tale of the progress of the College during the century which is past, but the advance made during the last twenty-five years has been so noteworthy and can be told so concisely that I venture to bring the facts with regard to it to the notice of Your Majesties.

In 1902 there were 1098 students; to-day there are upwards of 3200.

In 1902 the fee income was £16,500; to-day it is upwards of £64,000.

In 1902 the total income was £29,000; to-day it is upwards of £188,000.

And so from a very small beginning a hundred years ago has developed University College, a

College with five Faculties—Arts, Laws, Science, Engineering and Medical Sciences; with over 3200 students; with an eminent teaching staff numbering over 250. And in this connection, it would ill become me to pass over in silence the names of some of those who have taught and been taught in this place and have given lustre to its Professoriate and to the Roll of its Fellows. I select a few representative names from among those who are dead:

In the Faculty of Medicine: Professors—William Jenner, Robert Liston, E. A. Parkes, William Sharpey, Sidney Ringer, Ernest Starling.

And from the Roll of Fellows in Medicine: Sir George Buchanan, Henry Maudsley, Sir William Roberts; in Surgery: Marcus Beck, Rickman Godlee, Victor Horsley and Joseph Lister.

In the Faculty of Arts: Professors—Thomas Hewitt Key, W. S. Jevons (who was also a Fellow), Henry Morley and W. P. Ker.

And from the Roll of Fellows: Walter Bagehot, Thomas Hodgkin and Sir Walter Raleigh.

In the Faculty of Laws: Professors—John Austin, William Alexander Hunter, H. J. Roby.

And from the Roll of Fellows: Lord Cozens-Hardy, Sir George Jessel, both in their day Master of the Rolls, and Lord Justice Fry.

In the Faculty of Science: Professors—W. K. Clifford, Augustus de Morgan, William Ramsay, Alexander Williamson.

And from the Roll of Fellows: William Bayliss, George Carey Foster and Michael Foster.

"All these were honoured in their generation and were the glory of their times."

And now it only remains for me respectfully to thank Your Majesties for your presence here to-day and to ask Your Majesty to be graciously pleased to inaugurate our Celebrations.

REPLY BY HIS MAJESTY THE KING.

It is with great pleasure that the Queen and I have come here to-day to inaugurate the Centenary Celebration of this College, with its long and honourable record of service in the fruitful field of University studies. Established, as you have reminded us, at a time when the approaches to University education were still jealously guarded, it has seen the principles which inspired its foundation achieve a steadily increasing measure of national acceptance. Its hundred years of life have witnessed the removal of many barriers to educational progress; the extension to women of opportunities for higher education on terms of real equality with men, and the establishment in our Capital City of a great and still growing University, which has served by its example to encourage the foundation of similar Universities both in the United Kingdom and in other parts of the Empire. In these movements towards a genuinely popular system of University education the College has been an active and devoted pioneer.

The long roll of eminent Professors and Fellows of the College is proof of the illustrious part which

it has played in the advancement of knowledge: among its teachers both of the Arts and of the Sciences, Pure and Applied, the College can point to names honoured wherever the claims of learning and scholarship receive their due.

You have brought especially to our notice the great and rapid extension of the work of the College in the last twenty-five years, largely due to the guidance of your present distinguished Provost, and you can with pride look back upon your past achievements, while confidently looking forward to the future. At the same time it cannot be overlooked that the measure of your success is also the measure of your present need. In these days when all national activities are necessarily governed by finance, University education cannot escape the common lot. The growth of your work must be dependent upon your material resources. The increasing number of students, gratifying as it is, entails an increasing charge upon the College. The State now aids University Institutions on a scale which, to your founders, would have seemed impossible, but there are limits to public assistance. Moreover there is some danger to our national ideals of University freedom in too great reliance upon State grants.

You have been fortunate in attracting to your Medical Departments the munificence of a great American Foundation, and within the last few weeks one more signal illustration of its world-wide activity has been shown by a timely gift to

the University of London, of which you are a part, enabling the purchase of a building site rich in possibilities for the future. Fortunate as you and the University of London have been in benefiting by such noble generosity from the great American Nation, it is upon home support that you must rely, and I am confident that the Centenary Celebration of this great Institution will inspire the Citizens of London to assist as liberally in the future, as they have invariably done in the past, the aims and endeavours of their University College.

Dedication of the Great Hall

BY

H.R.H. PRINCE ARTHUR OF CONNAUGHT,
K.G., K.T.

24th JUNE, 1927.

This Hall is designed to be a permanent and visible Memorial, on the one hand of those Members of the College and Medical School who gave their lives in the Great War, and on the other of the Centenary of your Foundation.

The Roll of Service of the College and Medical School contains some 3600 names. Three hundred fell in the War: their names are recorded on the North and South walls of this building. May their honour and glory never be forgotten!

This building, originally planned by the great Donaldson as All Saints' Church, has been remodelled and beautified by the skill of your Architect, Professor Richardson, with whom has been associated a Building Committee under the able Chairmanship of Sir Andrew Taylor.

They seem to me to have achieved their aim in a signally happy fashion, and to have produced a result that fittingly commemorates both the great objects in view.

This College, conceived one hundred years ago, by men who had the courage to depart from the conventions of the time, has had a remarkable history, and has been the model on which most of the newer University foundations have been planned.

In spite of many difficulties, especially at the beginning, and hampered almost continually by want of sufficient material resources, your Foundation has held high the Torch of Learning and has, through the great men and women who have taught or been taught within its walls, added much to the world's store of knowledge.

The task of organising and developing University work in London has been difficult, and this College has nobly shared in helping to overcome the obstacles.

The recent settlement of the question of the site for the Headquarters of the University as a whole is a tribute to the wisdom of your Founders in selecting the site of the College; that solution and many other indications make me confident that the prospect that lies before the College at the beginning of its second hundred years is full of promise.

I therefore deem it a high privilege to dedicate this Hall for the great purposes for which your Foundation exists, in the faith that the possession of it will strengthen the intellectual, spiritual and social life of your community.

Before entering this Hall, I had the honour of unveiling the Dedication Stone, on which are inscribed these words :—

"This Hall is a Memorial unto the
Members of University College
and Medical School who
fell in the Great War,
1914–1919
and of
The Centenary of the Foundation,
1827–1927."

ROLL OF HONOUR.

MEMBERS OF UNIVERSITY COLLEGE AND UNIVERSITY COLLEGE HOSPITAL MEDICAL SCHOOL WHO GAVE THEIR LIVES IN THE GREAT WAR, 1914–1919.

William Reginald Abbati.
Ralph Aldwinckle.
Alister Ralph Speirs-Alexander.
Percy Heath Andrews.

THE GREAT HALL.

[*Memorial of the Members of the College and Medical School who fell in the War and of the Centenary.*]

This building, originally All Saints' Church, Gordon Square, was erected in 1846 from the design of Professor Donaldson, who was the first Professor of Architecture in the College. Shortly before the War it was bought by University College, and during the War was used for military purposes. At the time of the Armistice, a scheme was set on foot for the realisation of a Memorial to those members of the College and the Medical School who had lost their lives. As the College was badly in need of an Assembly Hall, it was decided with this end in view to embody the memorial as part of the reconstruction of the disused and dismantled church. The work of remodelling was begun in July, 1926, and has just been completed in June, 1927.

All who remember the building in its derelict state and recall the dreariness of its mutilated interior will be impressed by the transformation that has taken place. With the exception of the outer walls and the structural roof timbers, it is practically new. The Hall now has an ensemble which is in the grand manner, lacking only that direct approach from the South Cloister which will be constructed later.

The quiet dignity of the interior disarms criticism: the proportion of solids to voids is happily adjusted; nothing could be more satisfying than the new coffered wood ceiling which has been formed beneath the old roof beams, and the level of the gallery front is calculated with

a precision which satisfies the most critical eye. The internal remodelling has necessarily included the provision of galleries along both sides and across the West end.

These galleries are constructed of steel and reinforced concrete, and their supports—which have been cased in oak—are so arranged as to form aisles on either side and at the end of the Hall without serious loss of floor space. The walls of these aisles, for part of their height, have been sheathed in oak with flush panels between the windows, and on the panels the names of those who gave their lives in the War have been recorded in a continuous frieze of incised and gilt letters.

The colour scheme of the Hall—which has been governed by the choice of structural materials—relies upon the rich tone of the cedar colour of the coffered ceiling in contrast with the light oak of the galleries and panelling ; also upon the stone tint of the walls, and the Siena marbled decoration advisedly retained for the centre part of the recessed wall behind the platform. To ensure the harmony of the colour scheme both gilt and bronze have been sparingly introduced, and these metal finishings together with the amber glass of the windows help to produce an effect of unity. All the mouldings and carvings show originality of line. Although conceived in a traditional spirit, the detail is such that it bears the impress of the present day. In the main oak doors at both the upper and lower levels are bronze panels in which is to be seen the symbol of the Minervan Owl.

By excavating beneath the main floor a spacious basement storey has been formed, and in this cloak rooms, lavatories, and useful storage space have been obtained. The Hall is amply provided with exits. The façade to Gordon Street has been altered by the removal of the bell turret and other features which were considered to

proclaim the original ecclesiastical character of the building. New doors, windows, and architectural enrichments give the expression suitable to a collegiate hall. The Arms of the University, modelled by Mr. Percy Bentham, R.B.S., occupy the tympanum of the pediment; the Bath stone facings have been replaced by Portland stone ; and the brick-work has been repointed and cleaned down.

This difficult but successful reconstruction has afforded an interesting opportunity for collaboration between the Heads of several Departments connected with University College. The Architects were Messrs. A. E. Richardson and C. L. Gill, F.F.R.I.B.A., the former of whom is the present Professor of Architecture in the University ; the Structural Engineer was Mr. H. J. Collins, A.M.Inst.C.E., of the Department of Engineering ; the heating and ventilation were carried out by Mr. A. H. Barker, B.Sc., and the electric lighting by Professor W. C. Clinton, M.Inst.E.E. The acoustics of the Hall, which were formerly very imperfect, have been improved as the result of investigations made by the Architects and Mr. E. G. Richardson, M.Sc., Ph.D., of the Department of Physics. The General Contractors for the work were Messrs. Leslie & Co., of Kensington Square ; Messrs. Harvey & Co. and the Morris Bronze Foundry carried out the decorative metal work from the architects' designs ; and Messrs. Heal & Son, Ltd., supplied the chairs.

24th of JUNE, 1927.

RECEPTION OF DELEGATES— THE PROVOST'S WELCOME.

It is my privilege and pleasure to express, in the name of the College, to you, the Delegates and Student Delegates, a warm welcome. You have come from all parts of Great Britain, from many countries in Europe, Asia and America, from the Dominions beyond the seas, from India, Ceylon and other parts of the Empire.

You have come bearing messages of goodwill; others unable to come have sent messages of like kind; those messages and the presence, in such large numbers, of delegates representing some of the most famous Universities, Colleges and Societies for the promotion of sound learning throughout the world, cause us very great pleasure and give us legitimate cause for happiness and confidence in the future.

We are commemorating a foundation which at the outset met with considerable opposition and criticism; we are commemorating the wisdom and foresight of our Founders who, a hardy band of adventurers, dared to forsake the beaten paths and ventured out into fields and pastures new. They helped to break the bonds that had held learning

for years: they showed the way towards the experimental methods of to-day. You will see from the brochure that it has been our pleasure to present to you how extensive and comprehensive their plans were.

In their Statement of 1827, our Founders sketched a plan of organisation that took nearly a century to realise; they included most of the branches of learning now comprised in our five Faculties; they stressed the importance of scientific foundations for the study of Medicine and Engineering; they were not content to include only the languages and literatures of the great nations, but they mentioned "Northern Literature," a branch of work that was at long last brought into our programme by the enthusiasm of one of the greatest Professors (W. P. Ker) who has ever worked here. To the programme of our Founders have been added, as the need became apparent, the Schools of Fine Art, of Architecture and Librarianship.

These things have been made possible by the enthusiastic devotion of the men and women who have worked here as Professors and members of the Academic Staff, by the co-operation of our Presidents, Chairmen and Members of Committees, by the zeal of our Treasurers, and by the generosity of our Benefactors.

You delegates have come to join us in doing honour to the spirits of the past; you have come,

we believe, to give us encouragement in maintaining and developing a tradition that has proved its worth.

But that is not all: during these last years many of us have been examining the records of the past hundred years—and may I interject in that connection how Sir Rickman Godlee's unfinished task as our historian has been undertaken zealously and unselfishly by Mr. Hale Bellot: our examination of those records has properly led us to heart-searchings as to the present and the future. The review of a past, in which we feel pride, properly leads to such heart-searchings.

The coming of you delegates fills us with encouragement and strengthens our determination that we will hand on to those who follow us the traditions that have been made during the past hundred years, not as fetters, but as sources of inspiration for the future, so that the College may continue through many centuries to train men and women for the service of God and of mankind, and may spread both old and new knowledge to the betterment and greater peace of the changing world:

> "Rejoice that man is hurled
> From change to change unceasingly,
> His soul's wings never furled."

It is in that spirit, I feel sure, that you come, and in that spirit I accord you a welcome.

SPEECHES BY DELEGATES.

Lord Balfour, speaking on behalf of the delegates, said :—

"I come here as the Minister of the Crown who, as it happens at the moment, is most deeply interested in higher education, and especially higher scientific education in our great universities. In a survey of what the universities are doing in this branch of their activities nobody can omit or under-rate in the smallest degree the immense share which has been taken by this great College.

"The two older universities, whose glorious history goes back so many centuries, are, by some accident, which I do not pretend to explain, and which, so far as I am aware, is unique in the history of Europe, planted down, not in connection with any urban community, but in relatively rural solitudes by the Cam and the Isis. I am not sure that that has not had a beneficial effect on our early history and our academic traditions, which, of course, was never designed, but which is not without its importance. I think it compelled the students, isolated as they were from the rest of the world, to educate each other, and possibly the professors—though on this I speak without knowledge—were forced to carry out the same beneficent reciprocal task. However that may be, the tradition is deeply rooted in British education—and there is little to be seen of it mentioned in the

text-books—of the teaching of the student by the student, and possibly of the professor by the professor, that has done so much to make our system what it is.

"But in a community growing as we have been growing in population, with great urban centres visibly expanding, the old academic provision obviously became inadequate, and it was the vision of that fact, disguised perhaps by contemporary controversies, which led the great founders of University College to carry out what has been pioneer work of the last hundred years. I confess that when I look at the forecast they made of the University College which they desired to create, when I look at their programme of studies and compare it with anything which was explicitly realized in other parts of the kingdom, I think their work stands out as being little short, if short at all, of the boldest genius.

"It was in 1827 that the College began its great career. How many people were there at that date who foresaw the part which science was going to play—I do not say in the culture of mankind, or in the bringing home to peoples' minds and hearts of the wonders of the physical universe in which we live—but how many were there, in addition to that, who saw the great part science was going to play in civilization? Very few. But your founders foresaw it, and while foreseeing it they did not exaggerate the position of science, they did not say that science was the one thing worth studying, they did not ignore or minimise the humanities. They took a sane and complete survey of human knowledge as it was presented to them with a foresight that cannot be too much praised or admired. I cannot look back without remembering that they were the pioneers also in giving the advantages of higher education to women, in which I have been deeply interested. I hope this great University College will grow and flourish exceedingly."

Professor D. Saurat, Delegate of the University of Paris, said :—

"It is a peculiarity, and perhaps a fault, of French minds and of many continental minds also that they should look for the most important University in a country in the capital of that country. It will be said that this proves ignorance ; but also it proves logic, and on many occasions logic and ignorance walk hand in hand ; but it also happens fairly frequently that in the end logic triumphs over facts as they are, logic being facts as they should be. May this open new vistas into still greater developments for the University of London in general and University College especially.

"On this peculiarity of the French mind is based a special sympathy in the University of Paris for the University of London and University College. The Rector of Paris University has written of this peculiar situation of a centre of learning in the midst of a vast metropolis necessarily busy with many things besides learning. Here is an attempt to bring wisdom, not as a voice in the desert, but as a voice in that worse solitude of the spirit: a place where men fight for their daily bread. And men have listened to the voice. It is greatly to the credit, not only of teachers and benefactors, that there should be a University of London as there is a University of Paris, that there should be a University College as there is a Sorbonne, but even more perhaps to the credit of the great city itself, to the credit of London, to the credit of the English people. In the wilderness of traffic and business they have listened to the voice of wisdom. Therefore our homage to-day is also a tribute to the people of England, to the people of London.

"It seems to me that the University of London is particularly well situated to become an International University. Also University College has adopted a policy of boundless expansion—which is impressed upon

us during these days by the revelation of new and magnificent buildings—we contemplate them with mixed admiration and envy, but a friendly and cordial kind of envy. So University College also is particularly well situated to become international. London has been for generations past the great market of the world. The two celebrated Scotsmen who came to France to offer wisdom in the open market-place, and were in the dark ages the forerunners and initiators of Continental learning, overlooked London on their way. A strange mistake for Scotsmen. But now their countrymen know better. They can find in London also an open market-place where people will bid for learning. And they will find in London the same variety of people eager to acquire wisdom as in the old days their countrymen found in Paris. For from these British Isles men have gone forth all over the Continent, not only to learn, but also to teach. Now British teachers can remain home: the students will come to them from the Continent, from the world; and to no place will they come so easily, so willingly, and so fruitfully as to London. Perhaps, therefore, there is a sort of symbolical appropriateness in my being allowed to speak to-day here, for I am one of the new contingent, one of the latter-day pilgrims that have reversed the direction of the pilgrimage. Many students have gone from these Isles to Continental Universities for long ages past. I have had the honour of being one of the number of Continental students that now come to study in the University of London. My first University training I received in London, and largely in University College. As we cannot do honour to institutions without doing honour to men also, allow me to name my masters. Sir Gregory Foster taught us Gothic in those days and he ruled over us with the double iron rule of administrative authority and Gothic learning. Professor Daniel Jones was then founding

that admirable School of Phonetics, which is to us Continental students one of the chief attractions of London : for where shall we learn to pronounce English—if ever we do—but at University College ? Professor Brandin is so well known to all of us who care for Romance Philology, that I need only mention his name ; I feel as yet too close to him to praise him as he deserves without blushing myself. Professor R. W. Chambers taught us English, and many students from all over Europe duly came to fear and reverence him in affection.

" But beyond the living must we praise the dead. The name of Professor W. P. Ker is a source of pride to all that have sat under him, and I was one. He taught us not only English, not only literature, but he taught us how to think and how to feel. He was to us the representative of that element in the English which counts more than learning and intelligent character. He was an aristocrat of the spirit as well as an aristocrat of the mind. Allow me to speak of him as representing all the celebrated and forceful teachers under which many other Continental students have sat in Arts, in Sciences, in all the Faculties of the College. We came not only to learn, but to see. And we saw what the British were. Behind the teacher, whether he taught us Gothic or Chemistry, we found the man. And none better than Professor Ker typifies the sort of man we found behind our teachers. I knew Germans, Poles, Scandinavians, Italians, Spaniards, and Greeks at his classes. We were all struck with the extraordinary width of his mind as well as of his learning. He received each of us as though on his own ground, and I wish other students from other countries could speak and bear witness. Is it not also symbolical that I, as a French student, should have once asked him, a Scotsman, teaching English literature in London, to explain to me a difficult passage in the masterpiece of German literature, some

lines in the second part of Faust? Such is the internationalism that can be achieved at University College.

"In greater and greater numbers we shall come from the Continent and study in London : not only learning shall we acquire and take back, but a knowledge of men ; a knowledge of the English first of all—and perhaps a better knowledge of English character throughout the nations of the world, but especially throughout the nations of the Continent, is one of the most decisive factors that shall help the peace of the world—but also a a knowledge of other nations. What better observatory wherefrom to view the planet than London? What better chamber in that observatory than University College ?

"The reputation achieved in the past and the solidity acquired are, then, only beginnings. May University College flourish. All the Universities here represented will help it to flourish, and will rejoice in its prosperity."

Professor F. Clarke, Delegate of the University of Capetown, said :—

"I have to attempt, in a few words, to express something of the debt which the Universities of the British Dominions owe to the example and inspiration of University College. The occasion is the first I can remember when I have been called upon to carry the burden of an Empire, and, should I stagger a little under the load, I am sure you will forgive me.

"When I came to reflect a little on the characteristics of that age—in many ways so great, in some ways so little—that saw the birth of University College, I remembered that the first full sketch of the scheme for its foundation was the work of a poet, Thomas Campbell. That led me to turn to the poets of that age for some expression of its spirit. I remembered one who had

himself spoken of poets as 'the unacknowledged legislators of the world'—Shelley. In his 'Defence of Poetry' he speaks of poetry as giving us 'the image of the gigantic shadow which futurity casts upon the present.'

"May we not, without undue exaggeration, apply these words to the work which the founders of University College set out to achieve? They, too, were projecting in the present the image of a gigantic shadow cast by futurity and University College is here now to demonstrate its reality.

"Again, there is Keats, whose sonnet beginning:—'Great spirits now on earth are sojourning,' goes on to speak thus:—

> 'And other spirits there are standing apart
> Upon the forehead of the age to come.'

Is there not here also something that we can apply to these founders of ours? They were assuredly of those spirits 'standing apart, upon the forehead of the age to come.'

"The poets, then, express the same spirit which, through men like Campbell, took shape in a great new foundation. Like birds, they beat against the bars of a cage of conventions and narrownesses and tribalisms to reach the free air outside and burst into immortal song in the excitement of their effort.

"The nineteenth century, the century of University College, was also the century of the growth of the great Dominions. For a time it was by no means certain what their destiny would be, whether they would be of the emancipation which the poets and University College foreshadowed, or whether they would inherit the tribalisms and conventions against which these were in protest. But the victory was won and the Dominions worked out a life and a social order of breadth and

freedom which, if it was not the direct product of the work of University College, was at least the issue of the same spirit out of which the College had arisen, and which it existed to maintain. Both it and they belong to the same movement of the same age and are common products of the one spirit.

"If I were asked to express in a formula what is now the main task of the Universities of the Dominions, I should suggest something like this: 'The Exploration of the Content of the larger Loyalties.' That is to say, it is not Tribalism, as such, which is the enemy, but failure to justify and adjust the constituent tribalisms to the larger loyalty where alone they can have true being.

"South Africa itself affords an illustration. There is no country where government is more difficult, though (and here there are those present whose judgment on the point is of much greater value than mine) it is a surprisingly well-governed country. The necessity of turning to seek and explore the larger loyalties is forced upon us there by the facts of the situation itself. Tribalisms of race and colour and language and nationality would split us asunder did we not seek always some stable adjustment of them within a larger whole. So it is no accident that one whom I am proud to call a countryman of mine, General Smuts, should have worked out this philosophy of the Larger Loyalties in his 'Holism and Evolution.' That book is no academic product of the study, but the record of a philosophy which is itself the product of a life's experience.

"So I begin with Shelley and Keats, and end with General Smuts. That is the century of University College as the Dominions might view it. For University College has been throughout in the centre of it all. Its spirit is also the spirit of the Dominions, and the task of

the Universities of the Dominions is in essence no different from that which this great College was founded to fulfil.

"The Universities of the Dominions are widely diverse in type and constitution; they have many within their bounds to whom England can never be a Mother Country in the natural sense. Yet I feel quite sure that, so far as their spiritual relationship to University College is concerned, they would all be with me when I assert: 'We also are her offspring.'"

Professor J. L. Lowes, Delegate of Harvard University, said:—

"It is so seldom that the New World is in any respect older than the Old, that I welcome doubly the rare privilege of conveying to this great College, on the occasion of its Centenary, the greetings of age to youth, the felicitations of a University which in nine years will celebrate its tercentenary. For John Harvard, of Emmanuel College, Cambridge, left his small fortune and his books to found it when Shakespeare had been dead but twenty years, and just four years after John Milton, also on leaving Cambridge, wrote his sonnet on arriving at the age of twenty-three. And so I bring to you, in the first place, the warm congratulations of an institution which, for the first one hundred and forty years of its existence, was English and American at once. Nor in its loyalty since then to a new and permanent allegiance has it failed to remember with pride and gratitude its origins. And it greets you to-day as kin to kin.

"But I have also had committed to me the high responsibility of speaking on behalf of all the Universities of the United States. I do not know how many there are. The number probably falls somewhat short of the 42,767,500 which Mr. Bernard Shaw the other day gave as the number of dialects in these British Isles; but it is

undeniably large. It is perfectly possible that while I have been speaking a new American University has been born—a younger sister, with the same birthday as yours. And from all these Colleges and Universities—from those founded, like Harvard, by Englishmen in the seventeenth century, and from the eighteenth century foundations, and from all your coëvals since—especially from the great urban and State universities, with their responsibilities and opportunities, which are in so many ways akin to yours—on behalf of all these I present to you felicitations on the past and high hopes for a future which shall last for many centuries. For among the few stable institutions in a changing world have always been the Universities. And that is, perhaps, the best hope of the world.

"For a University is a body of men—and now, in these latter days, increasingly and happily, of women too—who first of all are seeking truth, and teaching truth, as they here found it. And the search for truth and the imparting of it are among the few things in the world which know no boundaries of nationality. The Universities here represented belong, and in a very real sense owe allegiance, not alone to England and the Empire, not alone to France, or Poland, or Sweden, not to America alone, but to the world. And closer relations such as those of which this celebration is a symbol—closer relations between the men and women of different nationalities who have been trained to think in terms of Arts and Sciences which are common to us all, must bring about, however slowly, a closer mutual understanding between the peoples whom they represent. And mutual understanding is the first *desideratum* of a half-shipwrecked world.

"Above all, as between the two great nations which speak a common tongue, and which are still essentially of common blood, the *sine qua non* for ourselves not only,

but, as most of us believe, for all the world, is precisely that reciprocal understanding which recognizes community and differences alike. The man in the street, on both sides of the Atlantic, sees the *differences*, and is naturally irritated or contemptuous, according to his kind. But if such training as our Universities afford means anything, it means development of the power to recognize beneath diversity the unity in which those variations which are incident to *life* inhere. Were we both dead, we should doubtless understand each other perfectly, for the dead have ceased from varying, and are for ever of a kind. That unhappy ground of mutual understanding, however, is for both of us, I trust, too many centenaries ahead to calculate.

"But the English-speaking peoples are only a single case in point. The world over, there is no higher mandate laid upon the men and women of the Universities than the application to international *human* relations—the most potent of all influences and the most neglected—of the same trained powers of discrimination which we apply to a problem in comparative philology, or to a chemical analysis.

"In a word, an occasion such as this, once more, is a symbol—a symbol of that world-wide community of interests in which the sons and daughters of the Universities are one. And the greetings which I bring from the Universities of the New World recognize wholeheartedly the achievements of centuries, beside which most of us can set but decades. But those past centuries in a very vital sense are ours as well as yours, and they stir us to both gratitude and emulation. And our hope, in which we know you share, is that the centuries which from now on we shall possess in common, may mean more to humanity than all that have gone before."

Centenary Celebrations, June 1927.

DELEGATES.

A. Universities and Colleges.

Universities and Colleges.	Name.	Status, Department, etc.
Aberdeen, University of . .	The Very Rev. Sir George Adam Smith, M.A., D.D., LL.D., Litt.D.	*Principal and Vice-Chancellor*
Adelaide, University of . .	W. T. McCoy, B.A. . .	*Member of Council*
Aix-Marseille, University of	Henri Padé	*Rector*
Alberta, University of . .	——— . .	———
Allahabad, University of	H. N. Randle, M.A., D.Phil.	*Philosophy*
Amsterdam, University of	J. C. van Eerde	*Professor*
Amsterdam, Free University of	F. W. Grosheide, D.D. . .	*Prorector*
Basel, University of . .	Gustav Senn, D.Ph. . .	*Professor of Botany*
Bedford College	Miss Tuke, M.A.	*Principal*
Bern, University of . .	Otto Funke, Ph.D.	*Professor of English Philology*
Birkbeck College . .	W. L. Hichens, M.A.	
Birmingham, University of	C. G. Robertson, C.V.O., M.A., LL.D.	*Principal*
Bishop's University, Canada	The Rev. Canon G. Abbott-Smith, M.A., D.D., D.C.L.	
Bordeaux, University of	Denis Saurat D-ès-L. . .	*Professor of French, King's College, London*
Boston University . .	W. O. Ault, M.A., Ph.D. . .	*Professor of History*
Bristol, University of . .	J. F. Dobson	*Professor*
British Columbia, University of	Mrs. Evlyn F. Farris, M.A., LL.D.	*Member of Board of Governors*
Brno, Masaryk University of, Czechoslovakia	Frantisek Chudoba, Ph.D. . .	*Professor*
Brown University, U.S.A.	V. W. Crane, A.M., Ph.D. . .	*Associate-Professor of American History*
Bryn Mawr	S. A. King, M.A.	
Buenos Aires, National University of	Dr. J. E. Uriburu	*Minister for the Argentine*
Calcutta, University of . .	1. Rev. W. S. Urquhart, M.A., D.Litt.	*Dean of Faculty of Arts*
	2. S. Sen, M.A., Ph.D. . .	*Lecturer in History*

Universities and Colleges.	Name.	Status, Department, etc.
California, University of	G. H. F. Nuttall, M.D., LL.D., F.R.S.	*Professor of Biology, University of Cambridge*

INAUGURATION

OF THE

Centenary Celebrations

BY

THEIR MAJESTIES THE KING AND QUEEN.

Thursday, the 23rd of June, 1927, at 3.15 p.m.

RECEPTION COMMITTEE.

The Vice-Chancellor: Sir William Beveridge.
The Chairman of the College Committee: The Viscount Chelmsford.
Sir John Rose Bradford.
The Right Hon. Lord Loch.
The Right Hon. Lord Meston.
Sir Andrew T. Taylor.
The Principal Officer: Dr. T. Franklin Sibly.
The Provost: Sir Gregory Foster.
The Dean of the Faculty of Arts: Norman H. Baynes, Esq.
The Dean of the Faculty of Laws: Professor J. E. G. de Montmorency.
The Dean of the Faculty of Science: Professor A. W. Porter.
The Dean of the Faculty of Engineering: Professor E. G. Coker.

(*Cont.*)

RECEPTION COMMITTEE (*cont.*).

The Dean of the Faculty of Medical Sciences: Professor G. Elliot Smith.

The Dean of University College Hospital Medical School: Dr. A. M. H. Gray.

The Tutor to Women Students: Miss Edith Goodyear.

The President of the Union Society: A. S. Gilbert, Esq.

The President of the Women's Union Society: Miss B. L. Turner.

Master of Ceremonies: Brevet-Colonel H. J. Harris.

Secretary of the Centenary Celebrations Committee: J. A. Creighton, Esq.

ARRANGEMENTS.

At 2.30 p.m. Members of the College and their guests will be in their places in the Hall.

While the guests are assembling, the Band of the Grenadier Guards (by permission of Lord Henry C. Seymour, D.S.O.) will perform a selection of music, under the direction of Lieutenant G. T. Miller, L.R.A.M., Director of Music.

At 3.15 p.m. Their Majesties the King and Queen, attended by their Suite, will arrive, by way of Tottenham Court Road, Torrington Place, and Gordon Square, at the entrance of the Great Hall, where a Guard of Honour furnished by the University of London Officers' Training Corps, under the command of Captain H. T. Jessop, will be mounted.

The Right Honourable Lord Eustace Percy, President of the Board of Education, will be in attendance.

On Their Majesties' arrival, the Royal Standard will be broken on the flagstaff.

His Majesty the King will inspect the Guard of Honour, and during the inspection a selection of music will be played by the Band of the Grenadier Guards.

Their Majesties will be received by the Chairman of the College Committee and by the Members of the Reception Committee, each of whom will be presented to Their Majesties.

Their Majesties will then enter the Great Hall, and, on their arriving on the Dais, the whole Assembly will sing the National Anthem.

[The Masonic Chairs used by Their Majesties were made by Thomas Chippendale, 1750, and lent for the occasion by Messrs. Harris & Co. of New Oxford Street.]

The Vice-Chancellor of the University of London will extend a formal welcome to Their Majesties the King and Queen.

The President of the Union Society, 1926–27, Mr. C. M. Wright, will present to His Majesty the King a copy of the Centenary Brochure.

The President of the Women's Union Society, 1926–27, Miss M. Grobel, will present to Her Majesty the Queen a copy, in gold, of the Centenary Medal, designed by Mr. A. H. Gerrard, of the Slade School.

The Chairman of the College Committee, on behalf of the College, will read an Address to Their Majesties, to which the King will read a reply.

The whole Assembly will stand whilst His Majesty is reading his reply to the Address.

The whole Assembly will sing the University Song by John Drinkwater.

Their Majesties will then proceed, via the South Cloisters and the Flaxman Gallery, to the first platform of the Portico, where they will be welcomed by the Members of the College for whom there was not accommodation in the Great Hall.

Their Majesties will then proceed to the South side Lawn.

The following presentations will be made by the Chairman of the College Committee :

Lady Durning-Lawrence.
Mrs. Wharrie.
Sir Otto Beit, Bart.
Sir Robert Kindersley.
The Master of the Drapers' Company (Mr. Percival Boyd).
Mr. A. L. Reckitt.
Mr. J. Jorgensen.
Major Guy Kindersley.
Professor Norman Collie.
Professor J. A. Fleming.
Professor Ernest Gardner.
Professor F. W. Oliver.
Professor Karl Pearson.
Professor Sir Flinders Petrie.
Miss Margaret Murray.
Dr. Francis W. Goodbody.
Dr. Guy P. Crowden.
The Assistant Secretary (Miss B. G. Greig).
President of the Union Society, 1926–27 (Mr. Wright).
President of the Women's Union Society, 1926–27 (Miss Grobel).

Tea will be served, on the South side Lawn, to the Royal Party and to those holding white tickets.

During the service of Tea, students will sing songs on the South central Lawn.

Their Majesties will visit Professor Sir Flinders Petrie's Palestinian Exhibition.

Their Majesties will visit the Exhibition of Paintings, Drawings, and Sculpture by the Staff and Students of the Slade School, from the date of its foundation, in 1871, to the present time.

At the conclusion of these visits, Their Majesties will take their departure from the Main Quadrangle, leaving by the Main Gates in Gower Street.

As Their Majesties leave, the National Anthem will be played by the Band.

When Their Majesties have left, the Royal Standard will be lowered.

After Their Majesties' departure, Professor Sir Flinders Petrie's Palestinian Exhibition, on the ground floor of the School of Architecture, and the Slade School Exhibition will be open to Members of the College, the Delegates, and the other guests.

Dedication of Great Hall

BY

HIS ROYAL HIGHNESS
PRINCE ARTHUR OF CONNAUGHT.

Reception of Delegates

AND

Presentation of Addresses.

Friday, the 24th of June, 1927, at 3.15 p.m.

RECEPTION COMMITTEE.

The Chairman of the College Committee: The Viscount Chelmsford.
Sir John Rose Bradford.
The Right Hon. Lord Loch.
The Right Hon. Lord Meston.
Sir Andrew T. Taylor.
F. V. Schuster, Esq.
A. Digby Besant, Esq.
The Principal Officer: Dr. T. Franklin Sibly.
The Provost: Sir Gregory Foster.
The Architect: Professor A. E. Richardson.
The Dean of the Faculty of Arts: Norman H. Baynes, Esq.
The Dean of the Faculty of Laws: Professor J. E. G. de Montmorency.
The Dean of the Faculty of Science: Professor A. W. Porter.

(*Cont.*)

RECEPTION COMMITTEE (*cont.*).

The Dean of the Faculty of Engineering: Professor E. G. Coker.

The Dean of the Faculty of Medical Sciences: Professor G. Elliot Smith.

The Tutor to Women Students: Miss Edith Goodyear.

The President of the Union Society: A. S. Gilbert, Esq.

The President of the Women's Union Society: Miss B. L. Turner.

Master of Ceremonies: Brevet-Colonel H. J. Harris.

Secretary of the Centenary Celebrations Committee: J. A. Creighton, Esq.

ARRANGEMENTS.

At 2.30 p.m. Members of the College and their guests will be in their places in the Great Hall *.

At 3 p.m. Their Royal Highnesses Prince and Princess Arthur of Connaught, attended by Major Wickham, will arrive and will be received by the Chairman of the College Committee and the Provost.

The Chairman of the College Committee will present the Chairman of the Great Hall Building Committee, Sir Andrew Taylor, and the Architect, Professor A. E. Richardson.

The Architect will invite His Royal Highness to unveil the Tablet of Dedication.

The Architect will present Mr. Shingleton, Managing Director, Messrs. Leslie & Co., Ltd., the Builders, and the Foreman, Mr. Knight.

The Chairman of the College Committee will present the Members of the Reception Committee.

---

* Songs will be sung under the leadership of Mr. Gibson Young.

On the arrival of Their Royal Highnesses on the Dais, the whole Assembly will sing the National Anthem.

The Chairman of the College Committee will welcome Their Royal Highnesses and, on his invitation, Prince Arthur of Connaught will read his DEDICATION OF THE GREAT HALL.

The whole Assembly will stand during the reading of the DEDICATION.

The Architect will present to Prince Arthur a Description and a drawing of the Hall by Mr. Hanslip Fletcher.

The whole Assembly will sing in unison :

[TUNE : "Eternal Father, strong to save."]

If God build not the house, and lay
The groundwork sure—whoever build,
It cannot stand one stormy day.
If God be not the city's shield,
If He be not their bars and wall,
In vain the watch-tower, men, and all.

Though then thou wak'st when others rest,
Though rising thou prevent'st the sun,
Though with lean care thou daily feast,
Thy labour's lost, and thou undone ;
But God His child will feed and keep,
And draw the curtains to his sleep.

PHINEAS FLETCHER.

The Provost will welcome the Delegates.

The following will speak on behalf of the Delegates :

The Right Hon. THE EARL OF BALFOUR
(*Lord President of the Councils for Scientific and Industrial Research and Medical Research*).
Professor D. SAURAT (*University of Paris*).
Professor F. CLARKE (*University of Cape Town*).
Professor J. L. LOWES (*Harvard University*).

The Delegates, presented by the Dean of the Faculty of Arts, and the Student Delegates by the President of the Union Society, will be received by the Chairman of the College Committee and the Provost, and will present their Addresses.

The whole Assembly will sing the University Song by John Drinkwater.

Their Royal Highnesses, attended by the Reception Committee, will then proceed to the South side Lawn, where Tea will be served to the Royal Party, and to those holding yellow tickets.

During the service of Tea, students will sing songs on the South central Lawn.

Presentations to Their Royal Highnesses will be made by the Chairman of the College Committee.

Their Royal Highnesses will visit Professor Sir Flinders Petrie's Palestinian Exhibition.

Their Royal Highnesses will visit the Exhibition of Paintings, Drawings, and Sculpture by the Staff and Students of the Slade School, from the date of its foundation, in 1871, to the present time.

At the conclusion of these visits, Their Royal Highnesses will take their departure from the Main Quadrangle, leaving by the Main Gates in Gower Street.

After Their Royal Highnesses' departure, Professor Sir Flinders Petrie's Palestinian Exhibition, on the ground floor of the School of Architecture, and the Slade School Exhibition will be open to Members of the College, the Delegates, and the other guests.

(The piano kindly lent by Messrs. Chappell.)

Centenary Celebrations.

PROGRAMME (Section I).

THURSDAY, JUNE 23RD.

Inauguration of Centenary Celebrations : Assembly in Great Hall (2.30 P.M.) : Their Majesties the King and Queen arrive (3.15 P.M.) : Their Majesties proceed to the Main Quadrangle (3.45 P.M.) : Their Majesties visit Professor Sir Flinders Petrie's Palestinian Exhibition and the Slade Exhibition (4.15 P.M.) : Their Majesties depart (5 P.M.).

Group Dinners (Evening).

FRIDAY, JUNE 24TH.

Informal Luncheon for Delegates (1.0 P.M.) : Assembly in Great Hall (2.30 P.M.) : Dedication of Great Hall by H.R.H. Prince Arthur of Connaught (3 P.M.): Reception of Delegates and Presentation of Addresses.

Centenary Play. Invitation Performance for Delegates and Special Guests (8 P.M.).

SATURDAY, JUNE 25TH.

Lectures and Demonstrations *.
Garden Party at Athletic Ground, Perivale (Afternoon).

Group Dinners (Evening).
Centenary Play (8.30 P.M.).

MONDAY, JUNE 27TH.

Lectures and Demonstrations * (Morning).
Conversazione (8–11 P.M.).

* For particulars see Section II.

TUESDAY, JUNE 28TH.

Lectures and Demonstrations * (Morning).

Tea arranged by Ladies' Tea Club for Delegates and other Guests (4 P.M.).

Centenary Play (8 P.M.).

WEDNESDAY, JUNE 29TH.

Lectures and Demonstrations * (Morning).

By the courtesy of the Keepers of the National Gallery and the National Portrait Gallery, special visits may be arranged on this day for Delegates and others who may desire to visit the National Gallery and the National Portrait Gallery (10–1 and 2–5 P.M.).

Past and Present Students' Dinner at the Hotel Great Central (Wharncliffe Rooms). Chairman: SIR OLIVER LODGE (7.15 for 7.30 P.M.).

THURSDAY, JUNE 30TH.

By the courtesy of the respective Trustees and Directors, special visits may be arranged on this day for Delegates and others who may desire to visit The British Museum, The Tate Gallery, The Natural History Museum, South Kensington, and The Victoria and Albert Museum (10–1 and 2–5 P.M.)

A Mass of Thanksgiving at Westminster Cathedral † (10.30 A.M.).

A Thanksgiving Service at Westminster Abbey ‡. Preacher: The Right Rev. the LORD BISHOP OF MANCHESTER (5.15 P.M.).

Centenary Oration on "Our Universities," by The Rt. Hon. H. A. L. Fisher, LL.D., D.Litt., F.R.S (8.30 P.M.). Followed by Concert.

---

* For particulars see Section II.

† Arranged by the University of London Catholic Society.

‡ Arranged by a Special Committee through the courtesy of the Dean and Chapter.

FRIDAY, JULY 1ST.

Lectures and Demonstrations * (Morning and Afternoon).

Luncheon at Drapers' Hall, by invitation of the Master and Wardens of the Worshipful Company of Drapers.

Centenary Play (8 P.M.).

SATURDAY, JULY 2ND.

Dance in Great Hall (7.30–11.30 P.M.).

---

* For particulars see Section II.

Centenary Celebrations.

PROGRAMME (Section II.).

EXHIBITIONS, LECTURES AND DEMONSTRATIONS.

The following Exhibitions and Demonstrations will be available only for Delegates, Members of the College, and the invited guests of the College on Thursday afternoon, 23rd June, and on Friday, 24th June (10–1 ; 2–5).

THEY WILL BE OPEN TO THE PUBLIC, WITHOUT TICKET, on the days and hours stated below :—

I. EXHIBITION OF WORKS OF ART by the Staff and Students of the Slade School, 1871–1927.

Open to the Public : Saturday, 25th June ... 10–1
Monday, 27th June ... 10–1
Tuesday, 28th June–Saturday, 2nd July } 10–5

II. BRITISH SCHOOL OF ARCHÆOLOGY IN EGYPT. Antiquities from the City of Gerar.

Open to the Public : Monday, 27th June–Saturday, 16th July } 10–5
(also evenings of 6th and 15th July, 6.30–8.30).

III. ANATOMY.

The Museum, Medical Sciences Library, and Radiographic Department will be open to the Public for inspection.

Exhibition of Books relating to Renaissance Anatomy and to rare Herbals. (The Librarian.)

Original drawings for Quain's Anatomy (10th ed. 1892) by Sir George Thane, Mr. T. W. P. Lawrence, and Dr. Gunn.

Casts of Skull and Casts of Brain-case of Fossil Man. (Prof. Elliot Smith.)

X-Ray Studies of the Skulls of Primates. (Dr. H. A. Harris.)

Maps illustrating the Diffusion of Culture. (Mr. W. J. Perry.)

Open to the Public, Tuesday, 28th June to Friday, 1st July ... ... 10–1 and 2–5

IV. ELECTRICAL ENGINEERING. Demonstrations by Prof. W. C. Clinton and his staff in the Electrical Engineering Laboratories.

Open to the Public, Tuesday 28th June to Friday, 1st July ... ... 10–1 and 2–5

V. GENERAL LIBRARY: Charts showing the growth of the College.

The Centenary Addresses received from Universities and other bodies.

Maps of London arranged and exhibited by the Reader in the History of London.

Open to the Public: Saturday, 25th June ... 10–1

Tuesday, 28th June to Friday, 1st July 10–1 and 2–5

VI. BARTLETT SCHOOL OF ARCHITECTURE: Drawings and Designs.

Open to the Public: Saturday, 25th June ... 10–1

Tuesday, 28th June to Friday, 1st July 10–1 and 2–5

VII. The Lectures and Demonstrations set out below are open to the Delegates, Members of the College and their invited guests, AND TO THE PUBLIC, without Ticket.

SATURDAY, 25TH JUNE.

Demonstrations under the direction of Professors Drummond, A. V. Hill, and Lovatt Evans.

Methods of Irrigation in India. (Mr. H. A. Matthews.)

Egyptology Collection. (Professor Sir Flinders Petrie; Miss M. A. Murray.)

The History of Anatomy. (Dr. Charles Singer.)

Total Solar Eclipse of June 29th, 1927. (Professor Filon.)

"The Development of Bloomsbury." (Professor Adshead.)

Hermidin. (Dr. T. G. Hill and Dr. Paul Haas.)

Habitat forms of *Mercurialis perennis*. (Mr. S. K. Mukerji.)

Monday, 27th June.

Demonstrations under the direction of Professors Drummond, A. V. Hill, and Lovatt Evans.

The Skull and Portraits of Henry Stewart, Lord Darnley (Sidelights on the Story of Mary Queen of Scots). (Professor Pearson.)

Megalithic Monuments. (Mr. W. J. Perry.)

The Romance of Coal—what it gives and how we get it. (Professor Williams.)

Agricultural Distributions in Central Chile. (Mr. H. A. Matthews.)

Demonstrations. (Professor E. J. Garwood and Miss E. Goodyear.)

The Angora Reform.—I. The Roots of the Law. (Count Léon Ostrorog)

The Relation of Philosophy to the Special Sciences. (Dr. S. V. Keeling.)

Is Metaphysics possible? (Professor Dawes Hicks.)

Demonstrations:—

(*a*) Psycho-galvanic-reflex apparatus.
(*b*) Binocular vision apparatus.
(*c*) Table. Mirror drawing apparatus.
(*d*) Table. Reaction Times.
(*e*) Table. Continuous recording machine.
(*f*) Table. Colour and Flicker Phenomena.
(*g*) Table. Mazes. Chart. The Psychological Tree.
(Professor Spearman and staff.)
(*For details see Appendix.*)

Liquid Air. (Dr. W. E. Garner.)

Tuesday, 28th June.

The Angora Reform.—II. Turkish Psychology. (Count Léon Ostrorog.)

British Guiana. A neglected colony. (Miss M. Shackleton.)

The Political Map of Europe in 1648. (Professor L. W. Lyde.)

An English Woodland. (Dr. E. J. Salisbury.)

A Portuguese Sand-dune. (Professor Oliver.)

Demonstrations :—

(i.) Production of high vacua.
(ii.) The Composition of colours.
(iii.) Polarisation of light.

(Professor Porter and staff.)

Geological Results of the St. George Expedition. (Mr. L. J. Chubb.)

Demonstration on the Johnston-Lavis Geophysical Collection. (Mr. K. W. Earle.)

Lecture-Demonstration on Standardisation of Pituitrin. (Dr. F. R. Winton.)

Demonstrations. (Professor Spearman and staff.)
See Monday, 27th June.

The School of Librarianship. (Sir Frederic Kenyon.)

Bibliography and Education. (Dr. E. A. Baker.)

Centenary Address—A Century of Chemistry at University College. (Professor J. Norman Collie.)

Optical Demonstrations of the Action of Cutting Tools. (Professor E. G. Coker and staff.)

Leonardo da Vinci's Helicopter. (Dr. Ivor B. Hart and Mr. E. T. Westbury.)

Ramblings of a Naturalist in Kashmir and Switzerland. (Mr. S. K. Mukerji.)

Centenary Address—"Culture and the Coming Peril." (Mr. Gilbert Chesterton.)

WEDNESDAY, 29TH JUNE.

Egyptology Collection. (Professor Sir Flinders Petrie; Miss M. A. Murray.)

Constituents of Seaweeds. (Dr. T. G. Hill and Dr. Paul Haas.)

The Root Systems of the Chalk Flora. (Dr. Violet Anderson).

London in 1827. (Miss E. Jeffries Davis.)

"Mediterranean" France. (Miss M. Shackleton.)

Geological Survey of Work in the Leeward and Windward Islands. (Mr. K. W. Earle.)

The Librarian as Archivist. (Mr. Hilary Jenkinson, Reader in Diplomatic, King's College, London.)

Librarianship and the Nation. (Mr. C. R. Sanderson.)

The Angora Reform.—III. The Reform. (Count Léon Ostrorog.)

Lecture-Demonstration on Action of Drugs on the isolated Heart. (Miss L. M. Pickford.)

Demonstrations. (Professor Spearman and staff.) *See* Monday, 27th June.

The British Museum. (Professor E. A. Gardner.)

Cinematograph Exhibit and Demonstration. (Dr. G. P Crowden.)

FRIDAY, 1ST JULY.

The Structure of Cyclones and their Control of Weather. (Mr. C. D. Forde.)

Demonstrations :—

(i.) Production of high vacua.
(ii.) The Composition of colours.
(iii.) Polarisation of light.

(Professor Porter and staff.)

Demonstrations by Mr. Stephen Jones. (Superintendent of the Phonetics Laboratory.)

Some Uses of Phonetics. (Professor Daniel Jones.)

A New Theory of Parallel Straight Lines and Right Angles. (Professor M. J. M. Hill, Emeritus Professor of Mathematics.)

Some Recent Experiments on Athletes. (Professor A. V. Hill.)

Centenary Address—A Century of Jurisprudence. (Professor J. E. G. de Montmorency.)

APPENDIX.

DEPARTMENT OF PSYCHOLOGY.

Professor Spearman and his Staff will give demonstrations of apparatus used in Experimental Psychology, including tests of mental and motor activities, between 12 noon and 1 P.M., on :

Monday, Tuesday, and Wednesday, 27th, 28th, and 29th June.

In Sharpe Theatre (every 15 minutes) :

1. PSYCHO-GALVANIC-REFLEX APPARATUS for measuring electrical changes in the human body following a mental disturbance, *i. e.*, that caused by threats to burn or to prick the subject's finger.

In Room C (continuous) :

2. BINOCULAR VISION APPARATUS. Originally devised by Professor Spearman during the War to determine certain abilities needful to ensure good landing of aeroplanes. Later used by Admiralty to determine ability for stereoscopic range finding.

3. TABLE.

MIRROR DRAWING APPARATUS set up, as used by Professor M. V. Gopalaswami for determining the factors and individual differences involved in certain kinds of Learning.

4. TABLE.

REACTION TIMES : Hipp Chronoscope for measuring in intervals of thousandths of a second the Response to any given stimulus, such as an auditory sensation.

5 TABLE.

Continuous Recording Machine for measuring in intervals of fifths of seconds fluctuations of attention.

6. TABLE.

COLOUR AND FLICKER PHENOMENA: Various colour wheels including Marbe Colour Wheel, Perseveration Disc, Colour Mixtures, Fechner's Colours, etc.

In Room D.

7. TABLE.

MAZES: Reversible Perspectives, etc., size, weight, illusions, etc. Apparatus for Testing Hand and Eye Co-ordination, momentary and continuous adaptations with stationary and moving targets.

CHART.

THE PSYCHOLOGICAL TREE: Illustrating the various branches of psychological study and the work done in the Department during the last twenty years.

HONOURS AND APPOINTMENTS.

Past and Present Students and Other Persons connected with the College.

The following are among the Honours and Appointments of which information has been received :—

(i.) Honours and Special Awards.

New Year Honours, 1927 :—

Peto, Mr. Basil Edward (Former Student).	Baronetcy.
Head, Dr. Henry (Fellow) ..	Knighthood.

King's Birthday Honours, 1927 :—

Heath, Sir H. Frank (Fellow)	G.B.E.
Pacy, Mr. Frank (Member of School of Librarianship Committee).	O.B.E.

Brodrick, Miss M. (Former Student).	Fellow of the Geographical Society of America.
Campbell, Mr. R. (Student)..	Industrial Scholarship with Messrs. Nobels, Ltd.
Chambers, Professor R. W...	Fellow of the British Academy
Coker, Professor E. G.....	Honorary Doctor of Applied Science, University of Louvain.
Coveney, Miss Dorothy K. (Student).	University Postgraduate Studentship.
de Montmorency, Professor J. E. G.	Fellow of the Royal Anthropological Institute.
Donnan, Professor F. G.	(i.) Member of the Royal Academy of Sciences, Amsterdam. (ii.) Member of the Advisory Council of the Department of Scientific and Industrial Research.

Drake, Mr. E. S. (Former Student).	Commonwealth Fund Fellowship, Columbia University.
Dyer, Mr. H. T. (Student of Bartlett School of Architecture).	(i.) Victory Scholarship (Gold Medal and £150 premium) of Royal Institute of British Architects. (ii.) Henry Jarvis Studentship of the Royal Institute of British Architects (on the recommendation of the Faculty of Architecture of the British School at Rome).
Eggleton, Mr. P. (Hon. Research Assistant, Physiology and Biochemistry).	Junior Beit Fellowship.
Elder, Mr. W. S. D. (Post-graduate Student).	Paul Philip Reitlinger Prize, for Essay on "The Ocular Circulation: its normal progressive relationships and their physiological significance."
Fee, Mr. A. R. (Post-graduate Student).	Junior Beit Fellowship.
Fleming, Professor J. A. (Chair of Electrical Engineering, 1886 to 1926).	(i.) Title of Emeritus Professor of Electrical Engineering. (ii.) Hon. Fellow of St. John's College, Cambridge. (iii.) President of the Victoria Institute and Philosophical Society of Great Britain.
Goodyear, Miss Edith	The Lyell Fund of the Geological Society.
Gurry, Miss Hilda M. (Student).	Jessel Studentship.
Hacker, Dr. H. P. (Hon. Research Assistant, Zoology).	Junior Beit Fellowship.
Hawgood, Mr. J. A. (Student).	Laura Spelman Rockefeller Fellowship.
Head, Sir Henry (Fellow) ..	The Moxon Gold Medal of the Royal College of Physicians.
Hicks, Professor G. Dawes ..	Fellow of the British Academy.
Hill, Professor A. V.	(i.) Royal Medal of the Royal Society. (ii.) The Baly Medal of the Royal College of Physicians.
Jeaffreson, Mr. J. W.....	Officier d'Académie Française.

Jones, Mr. Glyn Owen (Student of the Slade School).	British School at Rome Scholarship for Decorative Painting.
Lythgoe, Mr. R. J. (Former Sharpey Scholar).	Junior Beit Fellowship.
Marrian, Mr. G. F. (Assistant, Physiology and Biochemistry).	Junior Beit Fellowship.
Nixon, Miss Sadie (Student of the Slade School).	Royal Society of Arts Travelling Scholarship.
Parkes, Dr. A. S. (Hon. Research Assistant, Physiology and Biochemistry).	Junior Beit Fellowship.
Richards, Mr. H. W. P. (Former Assistant, History and Method of Science).	Norman Lockyer Research Studentship in Astrophysics.
Slater, Mr. W. K. (Hon. Research Assistant, Physiology and Biochemistry).	Senior Beit Fellowship.
Smith, Professor G. Elliot ..	(i.) Honorary Degree of D.Sc., University of Belfast. (ii.) Huxley Lecturer, 1926–27, University of Birmingham. (iii.) Huxley Memorial Lecturer, Imperial College of Science, May 1928.
Temperley, Mr. H. W. V. (Former Lecturer in Diplomatic History).	Fellow of the British Academy.
Thomas, Dr. F. W. (Reader in Tibetan and Lecturer in Comparative Philology).	(i.) Boden Professor of Sanskrit, University of Oxford. (ii.) Fellow of the British Academy.
Verney, Professor E. B.	Senior Beit Fellowship.
Winton, Dr. F. R. (Senior Assistant, Physiology and Biochemistry).	Junior Beit Fellowship.
Woollard, Dr. H.	(i.) Symington Prize of the Queen's University of Belfast (£30) for "the best piece of original work published in the Journal of Anatomy during the preceding two years" (awarded on advice of Council of the Anatomical Society of Great Britain). (ii.) Professor of Anatomy, University of Adelaide.

(ii.) Appointments.

(a) *University and Public.*

Ahmid, Mr. M. A. (Former Student).	Assistant Archæological Chemist to the Government of India.
Beattie, Mr. J. (Former Demonstrator in Anatomy).	Assistant Professor of Anatomy, McGill University.
Beaufoy, Mr. S. L. G. (Former Student).	Chief Town Planning Assistant to Liverpool Corporation.
Bellot, Mr. H. Hale (Former Senior Lecturer in History).	Reader in Modern History, University of Manchester.
Benton, Mr. C. D. J. (Former Student).	Town Planning Assistant to the Dartford U.D.C.
Berrill, Mr. N. J. (Former Assistant in Zoology).	Appointment in Department of Physiology, University of Leeds.
Bolton, Dr. C. (Fellow)	Croonian Lecturer, Royal College of Physicians, 1928.
Boyd, Mr. Percival (Member of College Committee).	Master of the Worshipful Company of Drapers.
Butler, Professor H. E.....	Member of University Senate.
Channon, Mr. H. J. (Former Assistant, Department of Physiology and Biochemistry).	Biochemist in Department of Pathology, University of Leeds.
Coward, Dr. Katharine (Former Assistant in Physiology).	Biochemist in charge of Vitamin-Testing Dept., Pharmaceutical Society of Great Britain.
del Re, Mr. Arundell (Former Student).	Professor of Italian, Imperial University of Tokio.
Drake, Mr. H. B. (Former Student).	Appointment in the University of Keijo.
Engelbach, Mr. R. (Former Student).	Joint Keeper, Cairo Museum.
Esdaile, Mr. Arundell (Lecturer in Bibliography).	Secretary of the British Museum.
Evans, Professor B. Ifor (Former Student).	Professor of English Literature, University of Sheffield.
Filon, Professor L. N. G.	Dean, University Faculty of Science, 1926–28.

Fisher, Mr. F. J. (Former Student; former Assistant in English).	Lecturer in English, University of Jena.
Forsey, Mr. G. F. (Former Student).	Professor of Classics, University College, Southampton.
Frankfort, Mr. H. (Former Student).	Director of Egypt Exploration Society's Explorations.
Garner, Dr. W. E. (Reader in Physical Chemistry).	Leverhulme Professor of Physical Chemistry, University of Bristol.
Greenwood, Dr. M. (Former Reader in Medical Statistics).	University Professor of Epidemiology and Vital Statistics tenable at the London School of Hygiene and Tropical Medicine.
Hamada, Professor Kosaku (Former Student).	Professor of Archæology, University of Tokio.
Hemingway, Dr. A. (Former Senior Assistant in Physiology).	Lecturer in Experimental Physiology, Welsh National School of Medicine, Cardiff.
Kabraji, Mr. K. K. J. (Former Student).	Meteorologist to the Government of India at Simla.
Krishna, Dr. M. H. (Former Student).	Professor of Archæology, University of Mysore.
Lloyd-James, Mr. A. (Hon. Lecturer in Phonetics).	Secretary to the Committee on Pronunciation of the British Broadcasting Corporation.
Lovell, Dr. R. I. (Former Student).	Tutor in History, Harvard University.
Medlicott, Mr. W. N. (Former Student).	Lecturer in History, University College, Swansea.
Miller, Mr. A. A. (Former Demonstrator in Geology).	Lecturer in Physical Geography, University of Reading.
Parsloe, Mr. G. (Former Assistant in History).	Secretary and Librarian of the Institute of Historical Research.
Pocock, Mr. L. G. (Former Assistant Lecturer in Latin).	Professor of Classics, Canterbury College, Christchurch, New Zealand.
Poynton, Dr. F. J. (Former Member of Staff, Department of Clinical Medicine).	Censor of Royal College of Physicians.

Richards, Mr. R. C (Former Quain Lecturer in Physics).	Civilian Education Officer, Royal Air Force.
Russell, Mr. W. W. (Former Assistant Professor, Slade School).	Keeper to the Royal Academy.
Spencer, Dr. H. R. (Emeritus Professor of Obstetric Medicine).	FitzPatrick Lecturer, Royal College of Physicians, 1926.
Stamp, Sir Josiah (Former Newmarch Lecturer).	Chairman of the London, Midland and Scottish Railway Company.
Tansley, Mr. A. G. (Fellow; one-time President and Treasurer of the Union Society).	Sherardian Professor of Botany, University of Oxford.
Tyler, Mr. E. (Former Assistant in Physics).	Lecturer in Physics, College of Technology, Leicester.
Varma, Mr. S. P. (Former Student).	Assistant Professor of English, Robertson College, Jubbulpore, India.
Wishart, Mr. J. (Former Hon. Research Assistant, Department of Applied Statistics and Eugenics).	Demonstrator in Mathematics, Royal College of Science.

(b) *School and Miscellaneous.*

Miss Kathleen Bardsley, Senior Science Mistress, County School for Girls, Gravesend; Mr. R. Bridges, Central Mining and Investment Corporation, Johannesburg; Mr. A. C. Burton, Physics Master, Liverpool Collegiate School; Mr. G. D. Cast, Assistant Science Master, Wintringham Day Secondary School; Miss M. Clayton, Assistant, Victoria and Albert Museum; Mr. S. W. Cooke, Research Chemist, S. A. Anglo-Persian Oil Company; Mr. F. W. Crews, Chief Assistant to Secretary of Institute of Transport; Mr. H. C. W. Davis, Science Master, Radley College; Mr. J. C. Ferguson, Geological Staff, Rhodesian Border Concession Co., Ltd., N. Rhodesia; Mr. T. F. Grimsdale, Geological Staff, Compana Mexicana, Hollandesa, "La Corona," S. A., Mexico; Miss Elizabeth A. Joels, Senior Mistress, Lowestoft Secondary School; Miss Greta R Keeble, Science Mistress, Home Training School, Northern Polytechnic; Mr. I. R. McHaffie, Appointment with The Synthetic Ammonia and Nitrates, Limited; Mr. R. M. S. Owen, Geological Staff, British Controlled Oilfields, Limited, Maracaibo, Venezuela; Miss Barbara Reading, Junior Assistant, Science Library, Science Museum, South Kensington; Mr. C. A. Waters, Chief Works Chemist, Messrs. Jenson & Nicholson; Mr. H. Norman Williamson, Mathematics Master, Munro College, Jamaica.

Former Students of the School of Librarianship:—

Miss Frances Astley, Librarian, Dr. Barnardo's Girls' Village Home, Barkingside; Miss Elspeth Brown, Assistant, Department of Scientific and Industrial Research; Miss Winifred Chadband, Assistant, County Library, Preston; Miss Ivy Barrett, Cataloguer, Royal Colonial Institute; Miss Hilda Clark, Assistant, University College Library; Miss Ivy Clark, Assistant Middlesex County Library, Southall; Mr. D. H. S. Coghill, Assistant Secretary, Catholic Council for International Relations; Miss Florence Davies, County Librarian, Nottingham; Miss Phyllis Downie, Assistant-in-charge of Library, St. Hugh's College, Oxford; Mr. L. J. P. Gaskin, Librarian, Royal Anthropological Institute; Miss Edith Gibbons, Assistant, Guildford Institute Library; Miss Joan Gubb, Librarian, Froebel Institute; Miss Margaret Gummer, Assistant to Editor of Library Association Subject Index to Periodicals, Aberystwyth; Miss Nora B. Harris, Student Assistant, University of London Library; Miss Greta Harting, Librarian, Conservative and Unionist Central Office; Miss Ena Hendry, Assistant, Library of London School of Economics; Mr. K. G. Hunt, Supervisor of Branches, Tottenham; Miss Mildred Hughes, Librarian at Y.W.C.A., 17 Clifford Street, W.; Miss Lorna Kensington, Filing Department, Messrs. Brunner Mond & Co.; Mr E. F. Kitchingman, Assistant, St. Pancras Public Library; Mr. D. H. Low, Assistant, Messrs. Hodgsons, Chancery Lane, W.C.; Miss Olive McMicken, Cataloguer in Antiquarian Book Department, Messrs. Grafton & Co.; Miss Annie Palmer, "Times" Book Club, Southport; Miss Dorothy Powell, Assistant, National Library of Wales, Aberystwyth; Mr. C. L. Quinton, Assistant, St. Pancras Public Library; Miss Guendolen Rees, Sub-Librarian, North Branch Library, Fulham; Miss Marjorie Seville, Assistant, Surrey County Library, Kingston-on-Thames; Miss Josephine Shearman, Part-time Library Assistant, Conservative Club; Miss Cynthia Stenhouse, Library and Information Bureau, British Non-Ferrous Metals Research Association; Miss Janet Symington, Assistant-in-charge, St. Bride Foundation Lending Library; Miss Jessie Waller, Assistant, County Library, Cambridge; Mr. J. H. Williams, Student Assistant, Reform Club Library; Miss Phyllis Wright, Indexer to "Complete Peerage."

PRINTED BY TAYLOR AND FRANCIS, RED LION COURT, FLEET STREET.
